MOHAMMED FAIZAAN SHARIFF

Bengaluru, India

+91-9538930518 faizaan1634@gmail.com LinkedIn Github

PROFESSIONAL SUMMARY

Computer Science student with a strong foundation in data analytics, SQL programming, and statistical analysis. Demonstrated expertise in building scalable ETL pipelines, interactive dashboards, and machine learning models using Python, Apache Spark, and cloud technologies. Proven ability to transform complex datasets into actionable business insights through advanced data visualization and quantitative analysis. Seeking to leverage technical proficiency and a problem-solving mindset in Google's apprenticeship program to drive data-driven decision making.

CORE COMPETENCIES

Programming Languages: Python, SQL (MySQL, PostgreSQL), R
Data Analytics Tools: Excel, Tableau, Power BI, Google Data Studio, Looker, Statistical Analysis
Big Data & Cloud: Apache Spark, Hadoop, Databricks, Google Cloud Platform, BigQuery
Machine Learning: Scikit-learn, TensorFlow, Predictive Analytics, A/B Testing
Libraries & Frameworks: Pandas, NumPy, Matplotlib, Seaborn, PySpark
Technical Skills: ETL Pipeline Development, Data Modeling, Database Design, Version Control (Git)

EDUCATION

Dr. Manmoham Singh Brngaluru City University **Karnataka, India**
Bachelor of Computer Science *Oct 2022 – Jun 2026*

Vijaya PU College (State Board) **Karnataka, India**
Class XII: 64.9% (CSBA) *2023*

Ilma International School (State Board) **Karnataka, India**
Class X: 83.8% *2021*

TECHNICAL PROJECTS

End-to-End Data Engineering Pipeline with Google Cloud **Jun 2024 – Aug 2024**

- Architected and implemented a scalable ETL pipeline using Google Cloud Platform (BigQuery, Cloud Storage) and Apache Spark to process 500,000+ e-commerce records daily, achieving 99.9% data accuracy and reducing processing time by 60%.
- Developed automated data ingestion workflows with Apache Airflow for real-time streaming data from multiple APIs, ensuring seamless integration and data quality validation using Python and SQL.
- Created a comprehensive monitoring dashboard using Google Data Studio and Tableau to provide stakeholders with real-time KPI tracking and business intelligence insights, resulting in a 25% improvement in decision-making efficiency.
- Implemented advanced statistical analysis and machine learning models using scikit-learn to identify customer behavior patterns, enabling predictive analytics for business forecasting.

Retail Analytics Dashboard with Advanced Visualizations **Apr 2024 – May 2024**

- Engineered an interactive business intelligence dashboard using Python (Pandas, Matplotlib) and Tableau, analyzing multi-dimensional sales data across 10+ regions and 50+ product categories with drill-down capabilities.
- Optimized complex SQL queries with window functions, CTEs, and joins across normalized database schemas (MySQL, PostgreSQL), reducing report generation time by 40% and enhancing data retrieval efficiency.
- Applied advanced statistical methods including regression analysis, correlation analysis, and time-series forecasting to identify seasonal trends and demand patterns, supporting strategic inventory management decisions.
- Collaborated with cross-functional teams to gather requirements and deliver actionable insights, presenting findings to stakeholders through clear data storytelling and executive-level reporting.

ADDITIONAL QUALIFICATIONS

Certifications: Google Analytics Certified, Microsoft Excel Advanced, IBM Data Science Professional
Analytical Skills: Hypothesis Testing, Regression Analysis, Time-Series Analysis, Predictive Modeling
Soft Skills: Critical Thinking, Problem-Solving, Cross-Functional Collaboration, Stakeholder Communication
Languages: English (Fluent), Hindi (Native)
